Algorithm: Cricket Live Score Board

Step 1: Start

Step 2: Declare variables team_names, wickets, batter_runs, total_overs etc

Step 3: Initialize variables I, j, total_runs, wide_balls, total_extras etc

Step 4: Display User's choice list

Step 5: Read variables for user's choice

Step 6: If user's choice == Update data

Read variables: wickets, Players_name, runs, overs etc

If i==wickets

Read variable: On & Non strikers name and runs

Total_extras ← wide_balls+no_balls+leg_byes

Total_score ← total_runs+total_extras

Net_runrate ← total_score / total_overs

If user's choice == Live Score

Display which team is batting

Display All players individual names & runs, total_scores, total_extras, total_overs and wickets in hand.

If user's choice == Exit

Stop executing the program

Step 7: Stop
